### **Notice of Allowability**

1. Applicants' amendment filed September 26, 2005, is acknowledged. Claims 8-10 are pending and under consideration in this examination.
2. Applicants' arguments maintaining the earlier traversal of the restriction requirement for electing a single sequence for prosecution is reconsidered, but not found to be persuasive. Applicants contend that the Examiner has based his arguments on a misunderstanding of parts of specification on page 38, lines 14-16, in asserting that the sequences are not capable of use together and that each sequence has a different function and/or effect.

However, this is not the case as is evident in the detailed explanation presented in the prior Office Action. Applicants are advised to revisit the detailed office action, page 2, last paragraph to page 3, and consider the explanation as a whole and not in isolation.

Further, in view of the amendment filed September 26, 2005, and cancellation of claims to non-elected inventions, Applicants' traversal to the restriction requirement is now moot.

3. Claims **8-10** are allowed.
4. The following is an examiner's statement of reasons for allowance:

This Application provides an unobvious method of protecting a plant from coleopteran insect infestation using a lipid acyl hydrolase of SEQ ID NO: 21.

No prior art reference or sequence of record, however, taken alone or in combination teach the claimed invention or provide motivation to one of ordinary skill in the art to use the skills available in the area of enzymology or molecular biology, to make the invention obvious.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
